## MARLENE BASKA ARTISAN SOAPS

Marlene Baska specializes in wild craft oil infusions and teas in natural soap, and she also makes goat milk, coconut milk, and nut milk soaps. Marlene's soaps are made from scratch, and her recipes and essential oil blends are original. She prefers to make natural soaps that are attractive, as well as wonderful for the skin. You will see the word "superfat" or "superfatted" in her descriptions, which means extra molecules of rich oils are dispersed throughout the soap to give it an enhanced conditioning quality. Marlene tries to keep at least one type of soap available that has local ingredients or a Southwestern theme, such as natural soap made with locally gathered prickly pears. She has been featured in the book, *Naturally Saponified: An International Gallery of Artisan Soaps*.
