RON CHRISTENSEN

WOODWORKING

Even as a kid, Ron enjoyed making things ranging from tree houses in the back yard to bee hives for his grandfather's bees. From there he went on to study woodworking and furniture design at Tennessee Tech University. After graduating with a BFA in 1985, he opened a small wood shop in Atlanta for 2 years. Then, moving back home to south Florida, he and his wife Alicia established Christensen Woodworks, a custom millwork and furniture shop which they owned and operated for 27 years.

In 2014, he and Alicia relocated to the Portal/Rodeo area. He has opened a small wood shop in Rodeo, which now gives him the opportunity to pursue more creative work.
